Governor's Office of Emergency Services Report Prepared by California State Warning Center

Weather Risk Outlook

	Fri, Nov 25	Sat, Nov 26	Sun, Nov 27	Mon, Nov 28	Tue, Nov 29	Wed, Nov 30	Thu, Dec 1
Fire Weather Low RH / Wind / Dry T-Storms	Southern	Southern				Southern	
Thunderstorms Wind / Hail / Tornadoes							
Cold							
River Flooding							
Wind	Southern		Coastal	All Regions	Southern	Southern	
Heavy Rain Flash Flooding / Debris Flow							
Snow			Inland (mountains)	Inland (mountains)			Inland (mountains)

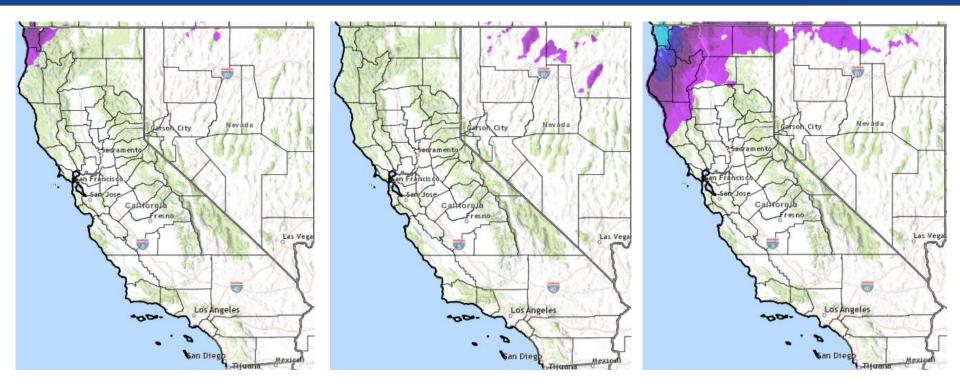

Risk Levels Little to None Minor Moderate Major Extreme

- The Santa Ana wind event will continue to wind down through the day Friday
 - O Wind gusts of 20-40 mph (locally 45-55 mph in the most prone mountains) will continue across much of southern California through Friday morning
 - Elevated to critical fire weather conditions will continue through Friday morning due to warm temperatures and continued dry conditions
 - Winds will slowly decrease through the day Friday, with some winds turning onshore by late
 Friday into Saturday
- Very light precipitation is possible across far northern California for Friday into Saturday, with no significant impacts expected
- A little better chance for rain and mountain snow will develop across the state late Sunday through Tuesday, with generally light precipitation possible; the heavier precipitation looks to remain north and east of the state
 - Accumulating snow could impact mountain travel, primarily in northern California
 - Gusty winds will develop in many locations with this storm, but higher relative humidities will reduce the threat of significant fire weather concerns

Daily Precipitation Forecast

Friday

Saturday

Sunday

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

6-10 Day Outlook (November 30 - December 4)

Temperatures

Below normal temperatures are strongly favored statewide

Precipitation

Above normal precipitation is favored statewide

8-14 Day Outlook (December 2 - December 8)

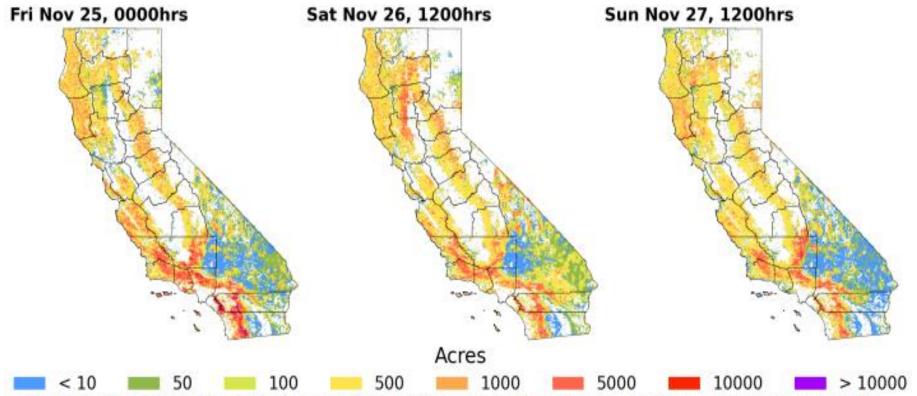

Temperatures

Below normal temperatures are favored statewide

Precipitation

 Above normal precipitation is favored across central California, otherwise near normal precipitation is favored across the remainder of the state

Wildfire Forecast and Threat Intelligence Integration Center STATEWIDE WILDFIRE RISK POTENTIAL

Each map shows the time with the highest wildfire risk potential. 8 hour simulations are run every three hours of the day to produce a map of wildfire risk potential in acres. The average number of acres in an area should not exceed the associated number in the legend. Risk forecast does not consider suppression efforts. Courtesy of Technosylva.

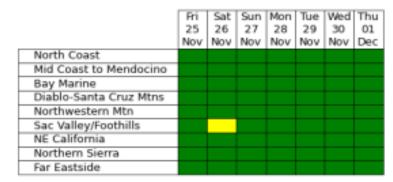

Wildfire Forecast and Threat Intelligence Integration Center Weekly Fire Potential and Weather Forecast

Northern Region

- A gusty N-NE-E wind event will briefly raise fire danger levels and significant fire potential to the "Low" category Today & Thu for a few PSAs, otherwise little to no risk.
- Will be monitoring northerly wind potential for Sat which could briefly raise fire danger levels once again within the Sac VIy.
- Fuel conditions are in a mixed flammability stage with some light herbaceous & shrub greenup across the lower elevations while dead fuel moistures are near to below normal areawide although snow cover exists above 4000-5000 ft.
- Dead fuel moisture values are near to below normal and will fluctuate during the next several days with a more noticeable lowering trend Wed thru Fri & rising trend Sun-Mon. ERCs will be near near to above normal during most of the next 7 days although some lowering should occur late in the period.
- Herbaceous grass and forbs are exhibiting a light flush of green-up, generally below 1500 to 2500 ft. The abundant standing dead from the previous growing season will remain until the combination of precipitation/wind and green-up can "melt" or alter the fuel bed.
- Live Woody Brush-Shrubs & Tree Canopies are likely in a mixed state of flammability with changes continuing due to soil moisture and dormancy trends. Dormancy has set in across the mid & upper elevations due to antecedent widespread freezing. Some new growth, especially in Chamise, will have re-initiated across the lower elevations thanks to additional soil moisture.

Southern Region

- Large fire potential will be elevated today over Santa Ana wind prone locations of southern California due to the gusty winds, warm temperatures, and low RH. The risk will be greatest at elevations below 5,000 ft.
- Rapid rates of spread will be possible in areas dominated by 100 hr diameter and smaller dead fuels. Areas characterized by heavier dead fuels or with a greater abundance of live fuels such as shaded or northfacing locations would see slower rates of spread.
- Large fire potential will remain elevated through around midday Friday, then become much lower for this weekend and next week due to cooler and more humid weather.
- ***ELEVATED FIRE POTENTIAL OVER PORTIONS OF SOUTHERN CALIFORNIA TODAY***
- Santa Ana winds will bring gusty winds, low humidity, and warm temperatures to the region today and into Friday, with elevated fire potential.
- Northeast winds of 25 to 35 mph with gusts to 60 mph will surface across the mountains and below the canyons and passes of Southern California throughout the day today and into tonight. Wind speeds will begin to decrease by early tonight.

SITUATION SUMMARY

Cal OES Activation Status				
State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC	
Level 1	Normal Operations	Normal Operations	Normal Operations	

2022 November Ebola Virus Event

The Medical and Health Coordination Center (MHCC) was activated on 11/09/22 at Level 3 (low) in response to 2022 Ebola Virus Event. The CDC released a Health Alert Network (HAN) health advisory regarding the Outbreak of Ebola Virus Disease (EVD) (Sudan ebolavirus) in Central Uganda. No suspected, probable, or confirmed EVD cases related to this outbreak have yet been reported in the United States.

• The MHCC will continue to be open at 0800 hours to 1700 hours Monday through Friday until further notice.

2022 Pediatric Surge

The California Department of Public Health (CDPH), Emergency Medical Services Authority (EMSA) and Department of Healthcare Services (DHCS) have activated the Medical and Health Coordination Center (MHCC) at Level 3 (low) in response to 2022 Pediatric Surge on 11/16/22 at 1500 hours.

The MHCC will continue to be open 0800 hours to 1700 hours Monday through Friday until further notice.

2022 May Monkeypox Virus

On 08/01/22, the Governor proclaimed a State of Emergency to support the State's response to Monkeypox. A copy of the proclamation can be found <u>here.</u>

The California Department of Public Health (CDPH) activated the Medical and Health Coordination Center (MHCC) at Level 3 (low) in response to the 2022 May Monkeypox Virus event on 05/24/22; and increased the activation to Level 2 on 07/18/22.

· Hours of Operation: Monday to Friday, 0800 hours to 1700 hours until further notice.

COVID-19 SUMMARY

Coronavirus Disease 2019 (COVID-19)

On 03/02/20 at 0700 hours, the Cal OES State Operations Center (SOC) activated at Level 1 in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

SMARTER Plan

On 10/17/22, Governor Newsom unveiled the "California Smarter Plan Updates October 2022". The plan emphasizes continued readiness, awareness and flexibility and helps ensure California can maintain its focus on communities that continue to be disproportionately impacted and stay prepared to swiftly and effectively respond to emerging COVID-19 variants and changing conditions. Governor Newsom is set to lift the State of Emergency in early 2023, and this update provides information on California's progress to date and how we move forward.

CDPH Statewide Travel Advisory

· For more information: CDC Travel Guidelines

Confirmed California COVID-19 Cases - Per California Department of Public Health Tracking COVID-19 as of 11/23/22 at 1630 hours:

- 10,611,075 total confirmed cases.
 - 37,317 Delta
- 96,701 total deaths.
 - 207 Delta
- Please see the most recent "Situation Report COVID-19" attachment for additional details.

SCE PSPS Event 11/24/22, Submission #15

SCE has notified Cal OES of a Public Safety Power Shutoff (PSPS) submission. Below is an update on the current status of the event.

- Current PSPS Stage: Event Concluded
- Total Customers Potentially Impacted: 0
- Total Medical Baseline Customers Potentially Impacted: 0
- Potentially Impacted Counties: None
- Weather Event Window: 11/24/22 from 0000 hours to 2100 hours
- Total Customers Currently De-energized: 0
- Total Medical Baseline Customers Currently De-energized: 0
- · Counties Currently Impacted by De-energization: None
- Highest Number of Customers De-energized as of this Notification: 9,073
- Current Number of Customers with Power Restored: 0
- Current Number of Medical Baseline Customers with Power Restored: 0
